## What Is Diazepam and How Does It Work?

Diazepam is a prescription medication that belongs to the benzodiazepine class. It is commonly used to treat conditions involving anxiety, muscle spasms, and certain neurological disorders.

Healthcare providers may prescribe diazepam for conditions such as:

- **Anxiety Disorder**
- **Panic Disorder**
- **Muscle Spasm**

- **Seizure Disorder**

Diazepam works by enhancing the activity of gamma-aminobutyric acid (GABA), a neurotransmitter that helps calm excessive brain activity. This calming effect can reduce anxiety and promote relaxation.
